

Olalekan Makinde

Junior Web Developer & Application Support Specialist

Remote-ready | Debugging | Web Applications | Application Support

PROFILE

Practical junior web developer and application-support specialist with hands-on experience building, debugging and testing modern web and mobile applications. Strong focus on evidence-led troubleshooting: reproducing issues, tracing APIs and database flows, isolating root causes, implementing focused fixes and verifying production builds. Experienced with React, Next.js, TypeScript, Supabase, APIs, PHP, MySQL, PostgreSQL, Node.js, Python and deployment workflows.

CORE STRENGTHS

Application debugging	Production build troubleshooting	API troubleshooting
Database & SQL debugging	Authentication & session flows	Deployment troubleshooting
React / Next.js support	Supabase / PostgreSQL	PHP / MySQL

TECHNICAL SKILLS

HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Node.js, PHP, Python, FastAPI, REST APIs, MySQL, PostgreSQL, Supabase, MongoDB, SQL, Firebase, React Native, Expo, Git, GitHub, API Debugging, Database Debugging, Authentication, Session Debugging, TypeScript Troubleshooting, Production Build Troubleshooting, Deployment Troubleshooting, Excel, Power BI, MetaTrader 5, Data Analysis.

SELECTED PROJECT EXPERIENCE

DebugLab — Debugging Portfolio

Technology: Next.js, TypeScript, GitHub, Vercel

Built a portfolio focused on practical debugging and application-support work. Documented investigations covering authentication/session flows, Supabase data flow, API behaviour and Next.js production-build/deployment troubleshooting.

FlowPilot AI — AI Office Manager

Technology: Next.js, TypeScript, Supabase, Stripe, Vercel

Built and tested a SaaS web application with authentication, protected dashboards, Supabase data, subscriptions and Stripe webhook integration.

Metabolic Health Coach

Technology: Next.js, TypeScript, Supabase, API Routes

Developed a health-tracking web application with profiles, protected dashboard functionality, database-backed data and API-driven daily plans; investigated authentication, session and data-flow issues.

EstateFlow AI — Real Estate CRM

Technology: Next.js, Supabase, PostgreSQL, Capacitor

Developed functionality for properties, leads, viewings and property images using database and Supabase storage features.

DataAnalystApp

Technology: React Native, Expo, JavaScript

Developed a mobile data-analysis application using React Native and Expo.

FXSignal Pro

Technology: Python, MetaTrader 5, yfinance, TA-Lib

Developed a Python-based market-analysis and signal project integrating financial data, technical analysis and MetaTrader 5.

DEBUGGING APPROACH

Understand → **Reproduce** → **Diagnose** → **Fix & Verify**. I use error messages, logs, code inspection, API responses, database records and production-build output as evidence. I then make focused corrections and retest the affected flow to reduce regressions.

EDUCATION & CERTIFICATIONS

ICDL Ireland — Cyber Security & Data Analyst — Galway, Ireland, 2025

MSLETB / Sligo — QQI Level 4 Web Design — 2024–2025

Yaba College of Technology — IPC1 Computer Science — 1995

Osun State College of Technology, Esa-Oke — HND Accountancy — 2000–2008

CAREER TARGET

Seeking junior remote opportunities in web development, application support, technical support or software troubleshooting where strong debugging, testing and problem-solving skills can contribute to reliable applications and customer outcomes.

PORTFOLIO

DebugLab — debugging-focused portfolio with documented technical case studies and project work.
